DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: Fig. 2, #50. This objection may be obviated by changing "52" on Page 9, line 9, to "50". A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: Image processor 10 on Page 9, lines 23 and 24 should be changed to image processor 61. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2882

3. Claim 1 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson (US Patent 5764386) in view of Robinson (US Patent 5821993). Robinson ('386) discloses a method and system for calibrating a scanner (col. 5, lines 1-3) coupled to a computer comprising retrieving means of operational data from memory (col. 8, lines 15, "prestored"), evaluating means of the data for degradation (inherent in calibrations), calibrating means to overcome degradations (col. 8, lines 14-15), and wherein the data comes from previous scans and calibrations (col. 8, lines 13-16).

However, Robinson does not seem to specifically disclose memory of the computer.

Robinson ('993) teaches memory of the computer (col. 5, lines 10-13).

It would have been obvious, to one having ordinary skill in the art at the time the invention was made, to have the computer of Robinson with the system and method of Robinson, since one would be motivated to use a computer to have sufficient amount of memory to contain the information needed to perform the calculations as shown by Robinson ('993) (col. 5, lines 10-13).

Allowable Subject Matter

4. The indicated allowability of claim 2 in the previous Office Action is withdrawn in view of the newly discovered reference(s) to Robinson ('386) and Robinson ('993).

5. Claims 6-8 are allowed.

6. Claims 3-5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2882

7. The following is a statement of reasons for the indication of allowable subject matter:
Regarding claims 3, 6, and 10, prior art does not specifically disclose or fairly suggest calculating the percentage of change between past and present operational data in combination with all the limitations in the claim and respective base claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Cheng Glen Kao whose telephone number is (703) 605-5298. The examiner can normally be reached on M - Th (8 am to 5 pm).
